Process Digitization Services

Exclusive Applications

- 1 Safety Audit Tool**
- 2 Permit To Work**
- 3 Contractor Management System**
- 4 Standard Work Instructions**
- 5 QR Code Application**
- 6 Offshore Risk Assessment Centre**
- 7 Visitor Safety Briefing Tool**

1 Safety Audit Tool

Mobile friendly solution for digitizing the audit process by storing all data in clouds and transforming activities and providing a Real-time platform for reporting and analysis.

2 Permit To Work

An app, aligning with Job Safety Analysis (JSA), that allows you to digitally generating permit for various processes, sorting out issues and saving time by reducing paper work.

3 Contractor Management System

Managing change through excellence driven Business Processes enablers ensuring Legal Compliance and corroborating with HSE parameters. This Consists of Furnishing Administrative Controls for cost optimization.

Services Overview

4 SWI

A software for digitizing the process of current manual Standard Operating Procedure or Standard Work Instruction documents and for reducing risks and errors

5 VQR

By scanning QR code of any required workstation or equipment, you can view available documents of those workstations and equipment. Used for managing and accessing documents in a click.

6 VORAC

A software for digitizing the process of current manual Standard Operating Procedure or Standard Work Instruction documents and for reducing risks and errors

7 Visitor Safety Tool

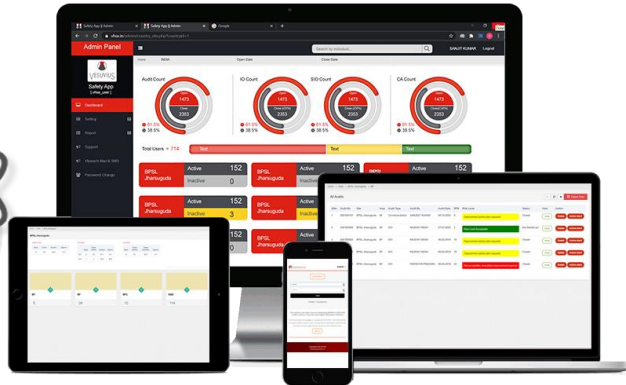

By scanning QR code of any required workstation or equipment, you can view available documents of those workstations and equipment. Used for managing and accessing documents in a click.

Learning Management Systems (LMS)

LMS software solutions manage administration, monitoring and reporting of online courses and training programs within an organization. It serves as a virtual learning platform where trainees can learn at their own pace based on their specific needs as well as check progress through self evaluation. Eframe focuses on seamless delivery of digital learning by creating a platform for online content inventory. It supports the latest international standards(SCORM compliance).

Need

- Monitoring progress and performance
- Personalized Learning Experience
- Human engineering to integrate Social Learning Experiences

Benefits

- Guarantees effective online learning
- Cost saving
- Consistency of training
- Meeting regulatory compliances

Learning Management Systems (LMS)

Vesuvius HSE Learning Centre

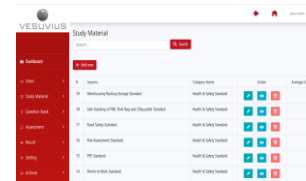

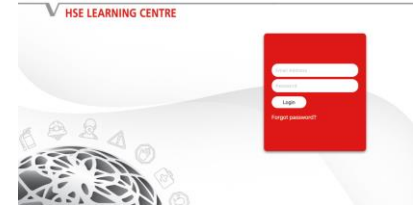

An LMS framed to inculcate a veritable training for employees to become adept with the company HSE standard. The LMS interface, compliant with the latest international SCORM standard was equipped with assessment and certification on completion of the entire course, providing full-proof data security.

User Role:

- Employees can log in with their IDs
- Learn different courses about the HSE processes
- Give Assessment to test their knowledge
- Get Certificates based on their performance

Admin Role:

- Track Employee's activities
- View their performance statuses via dashboard
- Create, modify or archive users and courses

Learning Management Systems (LMS)

POSH (Prevention Of Sexual Harassment)

Eframe Technical team designed an LMS embedded website for TCG-LS, consisting of POSH/GJW, Code Of Conduct and Confidentiality derived from corporate values. The LMS was interspersed with animation, illustrations, graphics & AV content with interactive & comprehensive self-assessment.

User Role:

- Users get digitized course materials
- Live classes for clearer insights
- Assessments and Quizzes for testing knowledge
- Instructor-led Training Courses

Admin Role:

- Utilize curated content base to support their teaching plan
- Use interactive tools to make learning more effective and interesting
- Track individual learner performance
- Address learning gaps through an online assessment.

Learning Management Systems (LMS)

Techno Canada LMS

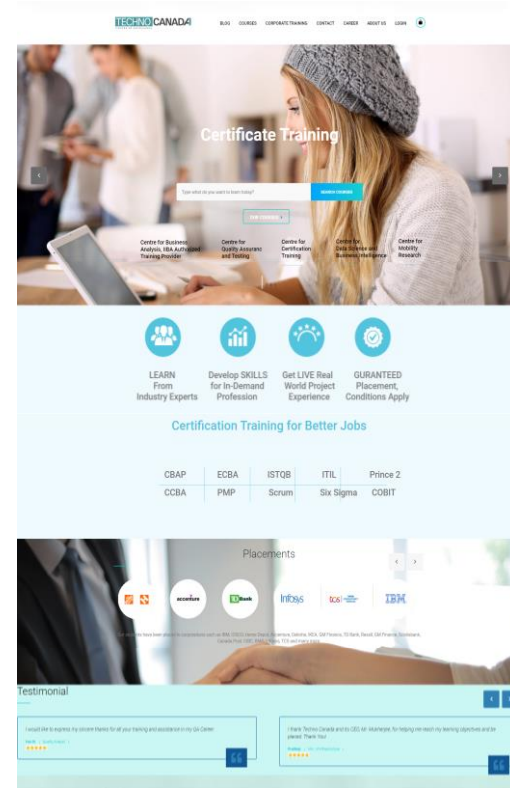

Eframe Technical team designed a LMS embedded website for Techno Canada, consisting of a variety of courses and course modules. Users can learn, and test their knowledges through online assessments. Moreover, this LMS has a feature where users can select the type of course they want to learn also different flexible payment methods.

User Role:

- Users can select the type of course: Online, Offline or Hybrid.
- Catchy contents are used for the ease of understanding
- Users have a number of payment method for the courses

Admin Role:

- Admin can view activity statuses of different users
- Admin can select which courses to show
- Admin can select individual functions for individual users

Learning Management Systems (LMS)

GeneoEsekha

Interactive digital platform created to nourish the young and fresh minds through simple and smart learning approach. Geneo Esekha aims to build and nurture holistic learning environment in schools through innovative teacher education programmes.

User Role:

- Students will be provided with courses which are taught in their school or other learning institutions
- Students can also have interactive live classes
- Students can access the software from anytime anywhere.

Admin Role:

- Admin can track the activity of the students
- Admin can allocate students with their respected courses
- Admin can create, edit or delete users and courses

The best Interactive Digital Platform for Simple and Smart Learning

WB Board based online learning & teaching platform for classes 5, 6, 7, 8, 9 & 10

[Sign Up Now](#)

Classes

Geneo Esekha is mapped to each chapter of the WBSE textbooks facilitating chapter-wise online learning and teaching. Students follow the same curriculum as what is taught in the class which promotes greater after-school learning.

Class 5

Geneo Esekha curriculum is based on the policy of learning, application, revision and assessment in mother language medium so as to make it accessible to the students of WBSE. Chapters of each subject are linked to the syllabus of WBSE and the learning content provided is supported and enhanced through video, text and audio. Each topic is supported with help of teacher, text videos, and animation to make it a fun learning activity.

[Get Started](#)

Class 6

Geneo Esekha has been designed to make it easy for students to learn and understand the concepts. It is supported with help of teacher, text videos, and animation to make it a fun learning activity.

[Get Started](#)

Features

Learn from animations and videos curated from leading education partners. Practice from chapter wise questions to identify learning gaps, prepare and score well in exams.

Digital Content Solutions

VR Simulation

Learning enriched with entertainment through simulation models

AV Production

Creative & stylish personalized Audio Visual communication tools

Corporate eLearning

Interactive & engaging self paced e-learning models

Animation/Explainer Videos

Out of the box explainer videos designed in engaging 2D or 3D animated format

Virtual Corporate Training

Online trainer led interactive courses replicating the experience of a physical training course.

VR Simulation

Simulation based learning environment provides a realistic, immersive experiences while learning. It is a safe method to provide hands-on training to employees.

Eframe understands how people learn and replicates a work environment to provide unique experiential learning, making the process smarter and more effective

VR Simulation Modules

- VR training
- AR training
- Simulation Games

Virtual Reality Based Simulation Solutions

Success Stories

Organisational Objectives

- To provide 360 degree Virtual Reality training assessment program
- The program will help associates to learn, enhance their awareness, assess their knowledge
- Probability of major errors will decline
- Help in saving time & Cost on their physical stowing process

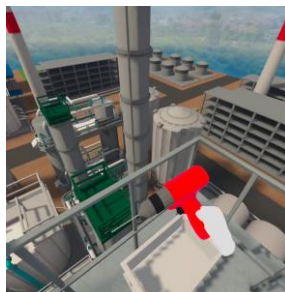

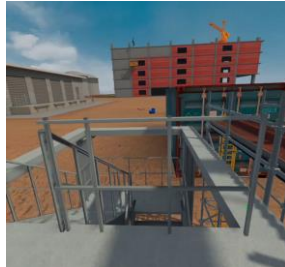

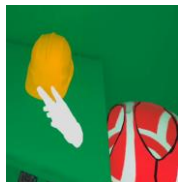

Solution Highlights

- Training on how to Stow properly
- Identifying right aisle
- Sorting the ASIN accurately
- Matching & stowing ASIN with bin accurately

Virtual Reality Based Simulation Solutions

Success Stories

Organisational Objectives

THYSSENKRUPP needed VR training module to educate employees about:

- Height work
- Scaffolding
- Electrical safety

Solution Highlights

Working at Heights

- Deals with creating a work at height experience and emulates all the necessary safety measures.
- Various risk assessment scenarios present that provides simulated hand interactivity in order to solve problems.

Working at Scaffolds

- Immerse users into a working at scaffolds experience and the necessary safety measures.
- Helps to generate the look and feel of working at scaffolds.
- Deals with various risk assessment scenarios and provides simulated hand interactivity in order to solve them.

Electrical safety:

- Importance of checking plugs and cords before using them. This phase will test the user in how they handle the situation, i.e., if they are reporting the issues correctly and so forth.
- The necessity to eliminate octopus' connections, i.e., connecting multiple plug points on a single hub and so forth.

Virtual Reality Based Simulation Solutions

Success Stories

Organisational Objectives

Eframe created a VR training module for Jhajjar Power Ltd. on

-

- Emergency Fire Evacuation within 90 seconds from the workplace to the Emergency Assembly point.
- Safe Evacuation.

Solution Highlights

- The importance of identifying and following the right safety signage.
- Following Signage to evacuate through the correct route.
- Crawling to avoid fire smoke obstructing the evacuation route.
- Following the good practice for not placing any obstacle in the evacuation route.
- Informative alert system to infer the best practices of what to and not to do during fire emergencies and maintaining emergency evacuation protocols.

Virtual Reality Based Simulation Solutions

Success Stories

Organisational Objectives

CEAT Ltd. wanted to make a safety first module for their employees, concerning factors, such as- Emergency Evacuation, Firefighting, PPE(Personal Protective Equipment) selection.

Emergency Evacuation:

Objective: Emergency Fire Evacuation within 90 seconds from the workplace to the Emergency Assembly point.

Solution highlights:

- The importance of identifying and following the right safety signage.
- Following Signage to evacuate through the correct route.
- Crawling to avoid fire smoke obstructing the evacuation route.
- Following the good practice of not placing any obstacle in the evacuation route.
- Informative alert system to infer the best practices of what to and not to do during fire emergencies and maintaining emergency evacuation protocols.

Virtual Reality Based Simulation Tool

Success Stories

Firefighting:

Objective: VR Training on Fire Fighting guided by voice over and instructions.

Solution Highlights:

- Finding the source and cause of fire
- Identifying the type of fire
- Informing the concern person
- Selection of right fire extinguisher
- Extinguishing the fire

PPE (Personal Protective Equipment):

Objective: Identifying the right PPE for the right job.

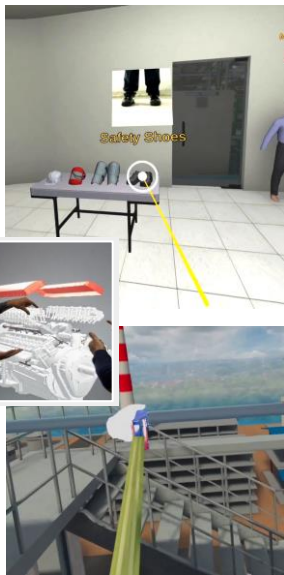

Solution Highlights:

- Understanding Different PPE's for over 100 different types of jobs.
- Selection of Job specific PPEs.
- Virtual training for using the PPE.
- Evaluation processed through assessment.

Virtual Reality Based Simulation Tool

Success Stories

Organisational Objectives

Eframe created a VR training module for refractory industry leader Vesuvius India Ltd. and focused on Transitional PPE assessment flow starting from generalized work to specialized work assessment

Solution Highlights

- Understanding Different PPE's for different type of jobs
- Selection of Job specific PPEs
- Virtual training for using the PPE
- Evaluation processed through assessment.

Audio Video Production

An AV training module aims on establishing a long lasting effect on a learners' mind . Rich Audio Visual interaction enhances comprehension and organizations will have better-trained and more engaged employees at their disposal.

Eframe makes Customized creative, persuasive and stylish Audio Video content on topical subjects. The customized lively and upbeat AV capsules are made for organizations keen on delivery of user friendly communication to all.

AV training modules

- Corporate Audio Visual
- Promotional Videos
- Live Action Training Videos
- To Cameras Training
- Briefing Videos
- Case Study Based Training
- Short films and Documentary
- SOP Training

Corporate eLearning Training

E-learning training module delivers structured courses or learning experiences electronically. Different elements such as live or pre-recorded lecture content, video, quizzes, simulations, games, activities, and other interactive elements can be very attention grabbing.

Eframe has understood that e-learning is beneficial with its self-paced e-learning models for better performance and higher efficiency in an organization.

E-Learning training modules

- Custom Multimedia Content
- Micromodules
- Mobile Friendly Content

Corporate E-Learning Solution

Road Safety Training Module for Vesuvius India

A training module was designed by Eframe for Vesuvius India Ltd. To educate the employees about safety rules and regulations .A compulsory e-certification was embedded in the course. An MCQ based online assessment system was generated to make the practice more interactive and lively. The training emphasized topics that helped initiation into the organization smoothly.

Corporate E-Learning Solution

Road Safety Training Module for HUL

Eframe created a thorough training and assessment module that was designed to provide the learning for improving the safe driving techniques on road. The content was covered in two languages - English & Hindi.

The entire eLearning module was developed based on the following topics:

- Defensive driving
- Hazardous driving conditions
- Staying safe guidance

Corporate E-Learning Solution

Vajra e-Learning:

The newly launched handheld device called 'Vajra' for ITC works lightening fast. This e-learning module provides step-by-step guide for its apt usage.

Uniconnect

A communication tool, introduced by Unilever is aimed to improve the communication system between customers and the company. This comprehensive multimedia presentation is also an interactive one, including video, graphics and animation.

Corporate E-Learning Solution

Route to Market:

Aimed for the marketing executives of Unilever, this presentation explains their route to market coverage. Supported by a user friendly toolkit, it helps them to preserve information in a structured format.

Joint Business Plan

This initiation by Unilever turns the annual area plan of tapping the untapped market for its distributors simple and easy. The presentation consists of an explicit e-learning user guide for the toolkit.

Astra

Astra is a complete business solution tool for modern trade. This presentation by ITC has been made for their business executives to make them aware of this new system.

Corporate E-Learning Solution

Techno Electric & Engineering

We created a corporate presentation on the organization, highlighting its history, work, products and future projects.

Advantage Bengal

A presentation portraying West Bengal as the most promising IT hub of India. An initiative by the IT department of West Bengal government.

Toy Park

The presentation highlights the eastern region of India as a resourceful business hub for toy industry and the Govt. focuses on the convenient aspects of the place.

Corporate E-Learning Solution

Berger Paints

A presentation on Berger Paints providing every required info about it. Starting from the history, of how Berger paints evolved to its progress, its product and career scope in it.

Titagarh Wagon Limited

Comprising of its rise, journey and works the presentation depicts a detailed overview of Titagarh Wagon Limited.

Corporate E-Learning Solution

Vesuvius Safety Induction Module

A training module made for new trainees in the factory where they get acquainted of the safety measures in a workplace. It is a software, which assesses them and skillfully they reach the next level, complemented with a certificate. This process helps the administration board to keep a track of their employees

Execution Excellence Programme

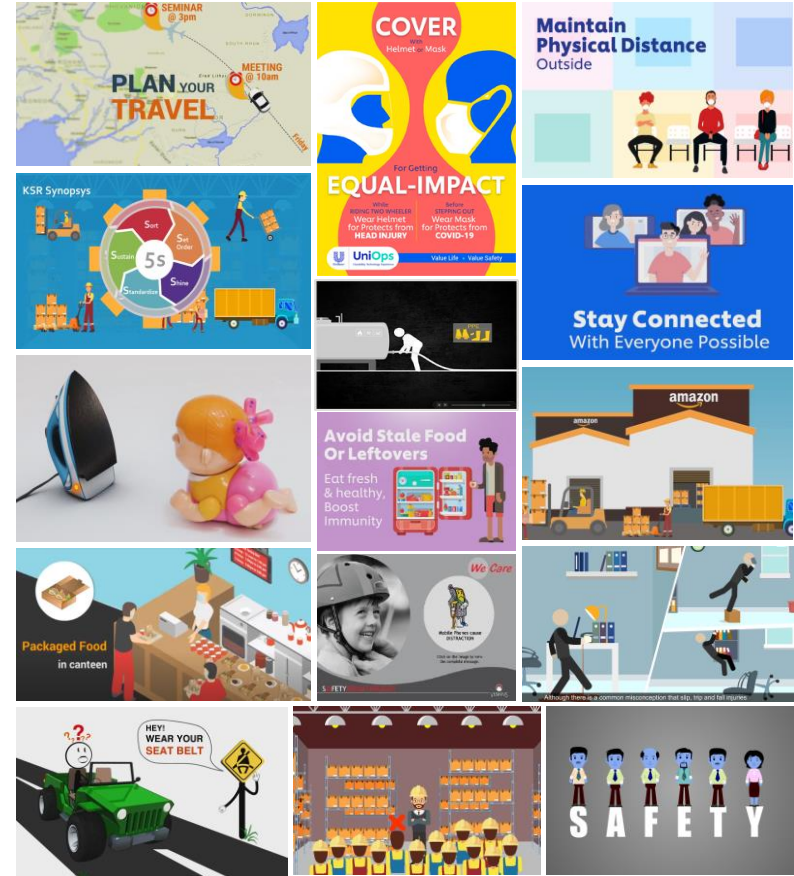

The corporate training module for HUL distributors helps them to understand the new trend of business and how they will get acquainted with this system

Animation/Explainer Videos

Creative short animated videos give viewers the flexibility to discover the best ways to make decisions, troubleshoot and solve problems or simply do their jobs a little bit better.

Eframe's creative team has understood that e-learning is beneficial with its self-paced e-learning models for better performance and higher efficiency in an organization.

Virtual Corporate Training

A live virtual classroom delivers trainer led interactive courses in an online environment that are designed to replicate the experience and benefit of a physical training course.

Eframe creates a platform that enables experts to convey their knowledge with the employees of an organization through pre-prepared contents.

Virtual Classroom features

- Interactive Corporate Training
- Integration with LMS
- Screen sharing and Whiteboards

An extensive training need analysis, and understanding the workflow of Vesuvius, a thorough end to end behavioral training program and motivational campaign was produced by Eframe. The campaign was successful in enabling each employee to become a change agent.

Creative Branding/Campaign

CEAT MISSION ZERO ACCIDENTS

Eframe created a three minutes awareness Film for securing commitment from each employee to take personal pledge to avoid accidents. Additionally appropriate display materials were also printed that emphasized on the correct behaviours to be practiced on floor.
